Carrara Stadium Redevelopment, Queensland

Market Sector: Buildings, Sport

Location: Carrara, Gold Coast, QLD

Office: Melbourne, VIC

Client: Project Services Queensland

Architect: Populous

Timeframe: 2009 - 2011

Description:
Norman Disney & Young's Melbourne office has been appointed by the consortium redeveloping the AFL Stadium at Carrara on Queensland's Gold Coast.

The $130 million redevelopment of the stadium will increase the capacity from 8000 seats to 25,000, and will become the home of the Gold Coast Football Club from 2011.

NDYLIGHT were engaged to design the architectural and sports lighting for this project. The lighting of the public concourses and grandstands uses indirect lighting, which also accentuates the form of the structure.

The interior lighting includes the design of members facilities to a standard higher than usually seen at sports stadia, to meet the AFL’s aspirations for the development of a member profile in this growth area for AFL.
